Common drugs of abuse.

Alere Toxicology helps you make informed decisions. The use of this chart will help you identify, understand, and monitor commonly abused substances. Turn to Alere to perform compliant, accurate, and reliable drug screens customized for your detection and monitoring needs.

IG CLASS AND IG ANALYTES	COMMON DRUG NAMES	STREET NAMES	DEA SCHEDULE ¹	WAYS USED	ADDICTION AND WITHDRAWAL	DRUG/METABOLITE MONITORED		AVERAGE DETECTION TIME ORAL
ATES / OPIOIDS	Tylenol® #3	Schoolboy	Schedule II	Oral; intrarectal; intramuscular;	Moderate-to-low risk of physical or psychological dependence. Withdrawal symptoms may include	Codeine, morphine	1-3 days	1-2 days
drocodone	Lorcet®, Lortab®, Hycodan®, Norco®, Vicodin®, Vicoprofen®	Hydros, dones, vics, itchies	Schedule II	subcutaneous Oral	drug craving, runny nose, yawning, sweating, insomnia, weakness, stomach cramps, etc. Moderate potential of physical or psychological dependence. Withdrawal symptoms may include	Hydrocodone, hydromorphone,	1-3 days	1-2 days
dromorphone	Dilaudid®, Hymorphan®	Juice, dillies, M2s, hospital heroin	Schedule II	Oral; intramuscular; intravenous; subcutaneous; intranasal; rectal; sublin-	severe pain, pins and needles, sweating, extreme anxiety, restlessness, sneezing, etc. Moderate-to-high risk of physical or psychological dependence. Withdrawal symptoms may include	norhydrocodone Hydromorphone	1-3 days	1-2 days
uromorphone			Schedule II	gual; transmucosal; buccal; transdermal Smoking; snorting; oral; rectal;	shaking, cold sweats, diarrhea, vomiting, self-doubt, emptiness, etc.	Trydromorphone	1-5 days	1-2 days
orphine	Avinza®, Kadian®, MS Contin®, MSIR®, Roxanol®, Embeda®	M, morph	Schedule II	subcutaneous; intramuscular; intravenous; intrathecal	High potential for physical or psychological dependence. Withdrawal symptoms may include several stages ranging from drug craving and anxiety to vomiting or loss of appetite.	Morphine	1-3 days	1-2 days
cycodone	Tylox®, Percocet®, Percodan®, OxyContin®, OxyIR®, Roxicodone®	Oxy-coffins, killers, percs	Schedule II	Oral; intramuscular; intravenous; intranasal; subcutaneous; transdermal; rectal; epidural	Moderate-to-high risk of physical or psychological dependence. Withdrawal symptoms may include anxiety, panic attacks, nausea, muscle pain, fevers, etc.	Oxycodone, oxymorphone, noroxycodone	1-3 days	1-2 days
ymorphone	Opana ER®, Opana IR®, Numorphan®	Blues, nu-blues, biscuits, blue heaven	Schedule II	Intravenous; intramuscular; subcutaneous; oral; rectal; intranasal	High risk of physical or psychological dependence. Withdrawal symptoms may include anxiety, panic attacks, nausea, muscle pain, fevers, etc.	Oxymorphone	1-3 days	1-2 days
NTHETIC OPIOIDS								
ıprenorphine	Suboxone®, Subutex®, Buprenex®, Butrans®	N/A	Schedule III	Sublingual; intramuscular; intravenous; transdermal; intranasal; rectal	Risk of physical and psychological dependence with prolonged use. Withdrawal symptoms are typically less severe than other opioids.	Buprenorphine, norbuprenorphine	3-5+ days	1-2+ days
ntanyl	Actiq [®] , Fentora [®] , Onsolis [®] , Duragesic [®] , Sublimaze [®]	N/A	Schedule II	Transdermal; intramuscular; intravenous; oral; sublingual; buccal	Moderate-to-high risk of physical or psychological dependence. Risk of postacute-withdrawal syndrome leading to possible psychiatric disorders, depression, anxiety, etc.	Fentanyl, norfentanyl	1-4 days	1-3 days
eperidine	Demerol®	Demmies, pain killer	Schedule II	Oral; intranasal; rectal; intravenous	Due to rapid onset, meperidine is more likely to be abused than other prescription opioids. Like other opioids, there is a potential for physical dependence.	Meperidine, normeperidine	1-3 days	1-2 days
ethadone	Methodose®, Dolophine®	Dollies, meth	Schedule II	Oral; intravenous; insufflation; sublingual; rectal	According to some physicians, methadone causes less of a euphoric high. Often used as an intermediate drug in opioid addiction recovery programs.	Methadone, EDDP (2-ethylidene-1,5-dimethyl-3,3-diphenylpyrrolidine	1-7 days	1-2 days
ntazocine	Talwin®	T's	Schedule IV	Oral; intravenous; intramuscular	Moderate-to-low physical dependence risk. May have risk of psychological dependence.	Pentazocine	1-3 days	1-2 days
ppoxyphene	Darvocet®, Darvon®	Pain killer	Nonscheduled by itself, Schedule IV in	Oral; intravenous; rectal	Risk of limited physical or psychological dependence with prolonged use.	Norpropoxyphene, propoxyphene	1-7 days	1-2 days
	Norman	N/A	combination.	Oral	High risk of physical or psychological dependence. Withdrawal symptoms may include anxiety,	Towards delicated and the second state	4.0 dovo	1 0 days
pentadol 	Nucynta® Ryzolt®, Ultracet®, Ultram®	N/A	Schedule II Schedule IV	Oral; intravenous; intramuscular;	sweating, trouble sleeping, etc. Risk of limited physical or psychological dependence with prolonged use. Withdrawal symptoms	Tapentadol, desmethyltapentadol Tramadol, O-desmethyltramadol	1-3 days	1-2 days
MULANTS	Tryzoit , Giliacet , Giliani		Schedule IV	rectal; sublingual; buccal; intranasal	may include anxiety, depression, anguish, sweating, restless legs, etc.	manadoi, o desmetriyiramadoi	1 o days	1 Z days
phetamine	Adderall®, Benzedrine®, Dexedrine®	Aimies, back dex, bennies, black beauties, brain pills, bumblebees, cartwheels, dexies, marathons, minibennie, pep pills, pixies, road	Schedule II	Oral, typical dosage: 5-15 mg	Risk of limited physical or psychological dependence with prolonged use. Withdrawal symptoms may include extreme hunger, fatigue, shaking, seizures, arrhythmia, etc.	Amphetamine	2-4+ days	1-3 days
thylphenidate	Ritalin®, Concerta®,	dope, speed, truck drivers, uppers N/A	Schedule II	Oral; transdermal	High risk of physical or psychological dependence. Withdrawal symptoms may include	Methylphenidate, ritalinic acid	2-4 days	1-2 days
	Methylin®, Provigil®			Smoking; insufflation; oral; transdermal;	depression, extreme fatigue, etc. High potential for physical or psychological dependence. Withdrawal symptoms may include			
ZODIAZEPINES	Nicorette®, Nicoderm®	N/A	Nonscheduled	intrabuccal; vaporized; buccal	anxiety, irritability, headache, hunger, craving for cigarettes, etc.	Cotinine, 3-OH-cotinine	2-4 days	2-4 days
razolam	Xanax®, Niravam®, Xanor®	Downs, nerve pills, tranks	Schedule IV	Oral	Risk of limited physical or psychological dependence with prolonged use. Withdrawal symptoms may include anxiety, irritability, insomnia, sensory disturbances, etc.	Alprazolam, α-hydroxy alprazolam	2-8 days	1-2 days
ordioress	Angirex®, Elenium®, Klopoxid®, Librax®, Libritabs®, Librium®, Mesural®,	Downs por a pille traction	Cohort	Orali integracio	Risk of limited physical or psychological dependence with prolonged use. Withdrawal		174	1.0
ordiazepoxide	Multum®, Novapam®, Risolid®, Silibrin®, Sonimen®, Tropium®	Downs, nerve pills, tranks	Schedule IV	Oral; intramuscular	symptoms may include anxiety, irritability, insomnia, sensory disturbances, etc.	Nordiazepam, oxazepam	1-7 days	1-2 days
azepam	Klonopin [®]	Downs, nerve pills, tranks	Schedule IV	Oral; intravenous; intramuscular; sublingual	Risk of limited physical or psychological dependence with prolonged use. Withdrawal symptoms may include anxiety, irritability, insomnia, sensory disturbances, etc.	Clonazepam, 7-amino clonazepam	3-14 days	1-2 days
azepate	Tranxene®, Novo-Clopate®	Downs, nerve pills, tranks	Schedule IV	Oral	Risk of limited physical or psychological dependence with prolonged use. Withdrawal symptoms may include anxiety, irritability, insomnia, sensory disturbances, etc.	Nordiazepam, oxazepam	1-7 days	1-2 days
epam	Valium [®]	Downs, nerve pills, tranks	Schedule IV	Oral; intramuscular; intravenous; suppository	Risk of limited physical or psychological dependence with prolonged use. Withdrawal symptoms may include anxiety, irritability, insomnia, sensory disturbances, etc.	Diazepam, temazepam, nordiazepam, oxazepam	3-14 days	1-2 days
nzepam	Dalmane®, Dalmadorm®	Downs, nerve pills, tranks	Schedule IV	Oral	Risk of limited physical or psychological dependence with prolonged use. Withdrawal symptoms may include anxiety, irritability, insomnia, sensory disturbances, etc.	N1-desalkyl-flurazepam, hydroxyethyl-flurazepam	1-3 days	1-2 days
zepam	Ativan® Lorax®, Emotavil®	Downs, nerve pills, tranks	Schedule IV	Oral; intramuscular; intravenous; sublingual; transdermal	Risk of limited physical or psychological dependence with prolonged use. Withdrawal symptoms may include anxiety, irritability, insomnia, sensory disturbances, etc.	Lorazepam	2-5 days	1-2 days
zolam	Versed, Dormicum, Hypnovel®	Downs, nerve pills, tranks	Schedule IV	Oral; intramuscular; intravenous; parenteral	Risk of limited physical or psychological dependence with prolonged use. Withdrawal symptoms may include anxiety, irritability, insomnia, sensory disturbances, etc.	α-Hydroxymidazolam	1-3 days	1-2 days
repam	Murelax®, Serax®, Serepax®, Alepam®, Adumbran®	Downs, nerve pills, tranks	Schedule IV	Oral	Risk of limited physical or psychological dependence with prolonged use. Withdrawal symptoms may include anxiety, irritability, insomnia, sensory disturbances, etc.	Oxazepam	1-3 days 4-6 weeks	1-2 days
	, ,	King Kong pills, jellies, jelly, Edinburgh eccies, tams, terms, mazzies,			, , , , , , , , , , , , , , , , , , ,		Chronic use ²	
azepam	Restoril®, Tenox®, Euhypnos®	temazies, tammies, temmies, beans, eggs, green eggs, wobbly eggs, knockouts, hardball, norries, oranges, rugby balls, ruggers, terminators, red and blue, no-gos, blackout, green devils, drunk pills, brainwash,	Schedule IV	Oral	Risk of limited physical or psychological dependence with prolonged use. Withdrawal symptoms may include anxiety, irritability, insomnia, sensory disturbances, etc.	Temazepam, oxazepam	1-4 days	1-2 days
CLE RELAXANTS		mind erasers, tem-tems, mommy's big helper, vitamin T, bit T, TZ						
soprodol	Soma®, Soprodal®	Dance, DS, Las Vegas cocktail, soma coma, wallace 200s	Schedule IV	Oral	Risk of limited physical or psychological dependence with prolonged use. Withdrawal symptoms may include stomach pain, sleep problems, headache, nausea, seizure, etc.	Carisoprodol, meprobamate	2-5 days	1-2 days
robamate	Miltown®, Equanil®, Meprospan®	Dance, DS, Las Vegas cocktail, soma coma, wallace 200s	Schedule IV	Oral	Risk of limited physical or psychological dependence with prolonged use. Withdrawal symptoms may include vomiting, ataxia, tremors, muscle twitching, confusion, etc.	Meprobamate	2-5 days	2-3 days
BITURATES								
barbital	Amytal [®]	Yellow jackets, angels, downers, red birds, phennies, yellows, tootsies	Schedule II	Oral; intravenous; intramuscular; rectal	Risk of physical and psychological dependence with prolonged use. Withdrawal symptoms may include anxiety, restlessness, insomnia, dizziness, seizures, psychosis, etc.	Amobarbital	3-10 days	1-2 days
barbital	Butisol®, Butibel®	Yellow jackets, angels, downers, red birds, phennies, yellows, tootsies	Schedule III	Oral	Risk of physical and psychological dependence with prolonged use. Withdrawal symptoms may include anxiety, restlessness, insomnia, dizziness, seizures, psychosis, etc.	Butabarbital	1 day-3 weeks	1-2 days
lbital	Fiorinal®, Fioricet®	Yellow jackets, angels, downers, red birds, phennies, yellows, tootsies, schoolboys	Schedule III	Oral	Risk of physical and psychological dependence with prolonged use. Withdrawal symptoms may include anxiety, restlessness, insomnia, dizziness, seizures, psychosis, etc.	Butalbital	3-10 days	1-2 days
obarbital	Nembutal [®]	Yellow jackets, angels, downers, red birds, phennies, yellows, tootsies	Schedule II	Oral; intravenous; intramuscular; rectal	Risk of physical and psychological dependence with prolonged use. Withdrawal symptoms may include anxiety, restlessness, insomnia, dizziness, seizures, psychosis, etc.	Pentobarbital	3-10 days	1-2 days
nobarbital	Belladonna®, Luminal®	Yellow jackets, angels, downers, red birds, phennies, yellows, tootsies, goofballs	Schedule IV	Oral; rectal; intravenous; intramuscular	Risk of limited physical or psychological dependence with prolonged use. Withdrawal symptoms may include anxiety, restlessness, insomnia, dizziness, seizures, psychosis, etc.	Phenobarbital	1 day-4 weeks	1-2 days
obarbital	Seconal®	Yellow jackets, angels, downers, red birds, phennies, yellows,	Schedule II by itself,	Oral	Risk of physical and psychological dependence with prolonged use. Withdrawal symptoms	Secobarbital	3-10 days	1-2 days
		tootsies, barbs, reds	Schedule III in combination.	Oral	may include anxiety, restlessness, insomnia, dizziness, seizures, psychosis, etc.	Gecobarbital	3-10 day3	1-2 days
TYCLIC ANTIDEPR	RESSANTS (TCA) Elavil®, Endep®	N/A	Nonechadulad	Oral	Little to no risk of physical or psychological dependence; however, there are withdrawal	Amitriotyline nortriptyline	2-14 days	1-2 days
				Oral	side effects such as nausea, headache, insomnia, or anxiety. Little to no risk of physical or psychological dependence; however, there are withdrawal	Amitriptyline, nortriptyline	2-14 days	
pramine	Norpramin®	N/A			symptoms such as headache, nausea, and malaise. Little to no risk of physical or psychological dependence; however, there are withdrawal	Desipramine Desipramine	3-15 days	1-2 days
epin	Sinaquan®, Adapin® Tofranil®, Tofranil-PM	N/A	Nonscheduled	Oral; intramuscular; intravenous	symptoms such as agitation, anxiety, insomnia, and, sometimes, rebound depression. Little to no risk of physical or psychological dependence; however, there are withdrawal side	Doxepin, desmethyldoxepin	2-8 days	1-2 days
pramine	(desipramine metabolite)	N/A	Nonscheduled	Oral	effects such as headache, restlessness, diarrhea, nausea, and flu-like symptoms. Little to no risk of physical or psychological dependence; however, there are withdrawal symptoms	Imipramine, desipramine	1-6 days	1-2 days
rotiline	Ludiomil®, Deprilept®, Psymion® Pamelor®, Aventyl®	N/A	Nonscheduled	Oral; intramuscular; intravenous	such as agitation, anxiety, insomnia, and, sometimes, a rebound of mania or depression. Little to no risk of physical or psychological dependence; however, there are withdrawal	Maprotiline hydroxyportriptyline	7-10 days	1-2 days
riptyline ROPATHICS	(amitriptyline metabolite)	N/A	Nonscheduled	Oral	symptoms such as headache and nausea.	Nortriptyline, hydroxynortriptyline	4-21+ days	1-2 days
apentin	Neurontin®	N/A	Nonscheduled	Oral	Abuse may lead to limited physical dependence or psychological dependence. Withdrawal symptoms may include anxiety, irritability, insomnia, sensory disturbances, etc.	Gabapentin	1-3 days	1-2 days ²
abalin					Abuse may lead to limited physical dependence or psychological dependence. Withdrawal			
abaliii	Lyrica [®]	Lycia	Schedule V	Oral; intravenous; insufflation	symptoms may include restlessness, insomnia, anxiety, relance of seizuros, etc.	Pregabalin	1-3 days	1-2 days ²
	Lyrica® IN REUPTAKE INHIBITORS		Schedule V	Oral; intravenous; insufflation	symptoms may include restlessness, insomnia, anxiety, relapse of seizures, etc.	Pregabalin	1-3 days	1-2 days²
CTIVE SEROTON				Oral; intravenous; insufflation Oral	symptoms may include restlessness, insomnia, anxiety, relapse of seizures, etc. Low risk of physical or psychological dependence.
