

## ▶ The Vibrant Advantage

Wheat and gluten sensitivities can be very difficult to identify. Rest assured, the Vibrant Wheat Zoomer is designed to examine the most complex associations with wheat and gluten sensitivities known today.

### Minimize false negatives

Test for reactivity to more wheat and gluten peptides than any other tool available.

### Enhance specificity

Comprehensive antibody recognition will simultaneously identify any of the conditions which may be associated with the following symptoms:

- Intestinal permeability (Leaky gut syndrome)
- WGA related vitamin D deficiencies
- Gluten ataxia and other neurological symptoms
- Dermatitis/eczema (skin)
- Celiac disease
- Wheat allergy

### Understand the source/triggers

A complimentary consultation with one of our highly qualified dietitians will help you identify the source of your symptoms and implement the most effective wellness plan possible.

### Better results

Highly accurate and quantifiable test results are easily accessible through our web-based patient portal.

## ▶ Get Tested Now...

Vibrant's Wheat Zoomer is here to help guide your lifestyle choices in consultation with your physicians and dietitians. It is intended to be used as a tool to encourage a general state of health and well-being.

Vibrant's Wheat Zoomer offers a comprehensive antibody detection that will simultaneously identify any of the following conditions; Celiac disease, gluten ataxia (neurological), wheat allergy, dermatitis/eczema (skin) and intestinal permeability.

Vibrant's Wheat Zoomer is designed to test and classify a larger cohort of wheat and gluten sensitive individuals.

1 in 7 Americans suffer from some type of wheat and/or gluten sensitivity.

Access to a highly qualified team of expert dietitians to offer guidance for you and your physician/dietitian for better health outcomes.

# WHEAT ZOOMER

Advanced technology.  
Affordable pricing.  
Accurate results.

The most comprehensive, sensitive and specific test on the market to determine the spectrum of wheat and gluten related disorders.

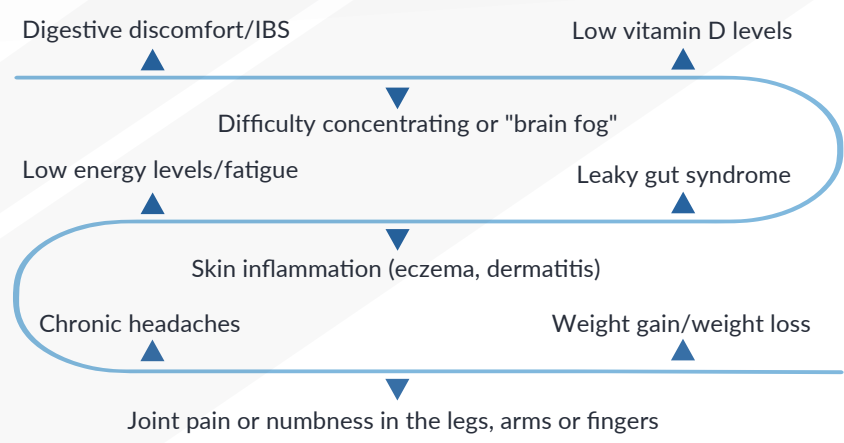

## ▶ What is wheat/gluten sensitivity?

Wheat and gluten sensitivities are immune responses in which, upon ingestion of wheat or gluten (from gluten containing grains), antibodies against the protein component of these grains are generated.

Gluten sensitivity is only a subset within a much larger group of wheat/gluten related disorders.

## ▶ Symptoms and conditions associated with wheat/gluten sensitivity

If you suffer from any of the above issues, you may benefit from the **Vibrant Wellness Wheat Zoomer.**

## ▶ What is the Wheat Zoomer?

Vibrant's Wheat Zoomer is a health analytics tool built to assist in the detection of wheat and gluten related disorders. It aids in the specific recognition of antibodies to wheat peptides-including gluten and non-gluten components along with intestinal permeability.

The Wheat Zoomer allows detection of protein antibodies associated with wheat and gluten sensitivities for information to reduce, monitor and manage the inflammatory effects of those sensitivities.

### ▼ Wheat Zoomer Intestinal Antibody Detection includes:

- All known deamidated gliadins
- Alpha, alpha-beta, gamma and omega gliadin
- HMW and LMW glutenin family
- Zonulin protein and actin
- tTG- DGP Fusion Peptides
- Wheat germ agglutinin (WGA)
- Differential transglutaminase: 2, 3 and 6
- Non-gluten wheat proteins
  - Farinins
  - Serpins
  - Globulins
  - Amylase/Protease Inhibitors
- Total IgA and IgG

...Plus many more...

### ▼ Wheat Zoomer Intestinal Permeability Panel includes:

- Lipopolysaccharide IgG/IgM/IgA
- Zonulin
- Anti-Actin IgG/IgA
- Anti-Zonulin IgG/IgA

# Vibrant's Advanced Technology

Vibrant utilizes a microchip platform, which synthesizes entire proteins, as peptides, and offers very specific antibody-to-antigen recognition. This results in an enhanced sensitivity and specificity compared to other platforms. This technology is unique to Vibrant.

### ▶ Regulatory Statement

The general wellness test intended uses relate to sustaining or offering general improvement to functions associated with a general state of health while making reference to diseases or conditions. This test has been laboratory developed and its performance characteristics determined by Vibrant America LLC, a CLIA and CAP certified laboratory performing the test. The test has not been cleared or approved by the U.S. Food and Drug Administration (FDA). Although FDA does not currently clear or approve laboratory-developed tests in the U.S., certification of the laboratory is required under CLIA to ensure the quality and validity of the tests.
